Scioly Summary Study Session - fuzzylogic - Repaired practice edition

Division C | Astronomy | Repair appendix

This appendix contains authored replacements and supplied written alternatives. It does not reconstruct unpublished historical material. For the listed item IDs, use this appendix instead of the archived wording and key.

Name: _____ Date: _____

1-a. (4 points) Authored replacement for source item Question 1-a: Why not model a galaxy as one star?

Unit: Galaxies, stellar populations, and the interstellar medium.
Worked-case data: A region is dark in visible light but bright in infrared and contains embedded young sources. Explain without declaring it empty.

Answer: _____
_____
_____

1-b. (6 points) Authored replacement for source item Question 1-b: Solve this case and explain your reasoning: A star’s luminosity is fixed. Its distance doubles. Predict its observed flux and name an independent check.

Answer: _____
_____
_____
