Captain’s Summer Exchange - Clark High School - Repaired practice edition - Answer key

Division C | Rocks And Minerals | Repair appendix

This appendix contains authored replacements and supplied written alternatives. It does not reconstruct unpublished historical material. For the listed item IDs, use this appendix instead of the archived wording and key.

ANSWER KEY - Review only after submitting.

4-6. (2 points) Authored replacement for source item Question 4-6: The original rock is the…

Unit: Metamorphism, stress, and mineral assemblages.
Worked-case data: A carbonate-rich rock near an intrusion recrystallizes without melting. Propose an interpretation.

A. Unit cell

B. Protolith

C. Streak

D. Ore grade

Correct: B

6-3. (2 points) Authored replacement for source item Question 6-3: Under uncertainty, a useful answer states…

Unit: Identification strategy, references, and timed practice.
Worked-case data: You have 60 seconds and two candidate minerals. Plan an evidence-first response.

A. Only a color

B. An unrelated process

C. Evidence and a plausible alternative

D. Unjustified certainty

Correct: C

7-2. (4 points) Authored replacement for source item Question 7-2: How can a correct answer still reveal a learning gap?

Unit: Identification strategy, references, and timed practice.
Worked-case data: You have 60 seconds and two candidate minerals. Plan an evidence-first response.

answer: It may have been guessed or based on a nondiagnostic feature that will fail on another specimen. (4 points).

7-4. (2 points) Authored replacement for source item Question 7-4: Mohs hardness is…

Unit: Minerals, rocks, and diagnostic evidence.
Worked-case data: An unknown scratches gypsum but is scratched by fluorite. What can you conclude?

A. A toughness scale

B. An ordinal scratch scale

C. A linear mass scale

D. A color scale

Correct: B

7-5. (2 points) Authored replacement for source item Question 7-5: Equal axes and right angles describe the conventional…

Unit: Formation environments, crystal systems, and habit.
Worked-case data: A massive specimen lacks visible faces. Does it lack crystalline order?

A. Triclinic system

B. Monoclinic system

C. Orthorhombic system

D. Cubic system

Correct: D
