Scioly Food Science Minitest 1 - Repaired practice edition - Answer key

Division B | Food Science | Repair appendix

This appendix contains authored replacements and supplied written alternatives. It does not reconstruct unpublished historical material. For the listed item IDs, use this appendix instead of the archived wording and key.

ANSWER KEY - Review only after submitting.

2. (1 points) Authored replacement for source item 2: Classify acetic acid as an amino acid, a protein, or an acid.

answer: An acid; acetic acid is a carboxylic acid, not an amino acid or protein. (1 points).

6. (1 points) Authored replacement for source item 6: Is an aqueous solution of sodium bicarbonate mildly acidic or mildly basic?

answer: Mildly basic. The original paper prints Base as A, whereas its key incorrectly labels it B. (1 points).

8. (1 points) Authored replacement for source item 8: A cylindrical bread sample has mass 7 g, radius 2.6 cm and thickness 0.6 cm. Use pi=3.14. Calculate its density to the nearest hundredth in g/cm^3.

answer: 0.55 g/cm^3 (1 points).

Numerical target 0.55; absolute tolerance 0.0011. Accepted units: , g/cm^3.
